Moved by WHITE, second by ELLIOTT, to approve the request for payment for half of the Grinnell-Newburg School district expense for transporting students across major highways.

Witt requested a brief history of the item. White explained that in the past a child was killed and one child was injured while attempting to cross Highway 6 on their way to school. After this accident, the city and the school agreed to create pick up points for the buses to transport children safely across the highway. White estimated that the city had paid half of this cost for the last 15 – 20 years.

Roll Call Vote: Ayes: White, Elliott, McNaul, Worley, Witt. Motion carried.

- Discussion in regard to the city code update.

White summarized that staff has been working with Iowa Codification in preparing the draft of the city code. The committee will report on this item at a later date.

- Discussion in regard to the Capital Improvement Program FY 07-11.

The committee determined that each of the other committees will review the projects as proposed prior to them being reviewed by the Finance Committee. This way, each committee will be aware of what the departments are planning for future projects.

- Discussion related to the city purchase of Poweshiek Water Association accounts in south Grinnell.

White commented that the agreement continues to be under review.

- Discussion in regard to the Park Plan.

Elliott stated that the Public Works and Grounds Committee will meet Monday, August 22, 2005 at 6:15 pm. Hage will contact the Park Board and the Park Task Force Members.

- Update on the proposed storm water utility by the Water Resources Director.

The storm water utility is scheduled to be implemented on January 1, 2006. The intent of the utility is to identify general fund expenses that are being paid to maintain the storm water system. The city has the authority to generate revenue needed to cover the expenditures to relieve the burden on the general fund. This would require a new fee added to the bimonthly utility billing. If a property owner does not receive a water bill, they will still be billed for storm water. The federal government is on the verge of adopting far more stringent laws in which the city will be required to comply. The city is attempting to get ahead of the substantial cost that will be incurred at that time.

- Updated in regard to the Arbor Lake to Industrial Avenue Bike Trail and the REAP grant application.

Elliott explained a grant application has been submitted by Imagine Grinnell to request funding for construction of Phase 4B of the bike trail. If funding is awarded, it will cover the northeast sections of Arbor Lake. Elliott reminded the council that the bike trails will be incorporated in to the park plan, however the city still needs to figure out how to connect the pieces of the trails and how to pay for those connections.

- Discussion in regard to the opening of the brush/compost site.

The compost/brush site will open Tuesday, September 6, 2005 at 3:00 pm. The site will be open on Tuesday, Thursday, Saturday and Sunday. The Mayor will deliver the first load of brush to the site prior to the regularly scheduled council meeting. The site does require a user fee. Citizens will be able to purchase a prepaid punch card at a reduced rate prior to the opening. This will allow the attendant of the site to handle less money and provide more ease of disposal to the user. A shed will be constructed for weather protection and the safety of the attendant at the site.

A few items remain for completion of construction of the site therefore the city will not make final acceptance and payment of the project until the items are completed. However, the city cannot open the site without assuring the contractor that they recognize that only specific items remain.

Moved by ELLIOTT, second by WITT, to approve the certificate of substantial completion. Roll Call Vote: Ayes: Elliott, Witt, McNaull, White, Worley. Motion carried.

- Update in regard to the construction of the AWOS.

The easement remains unresolved for the placement of the AWOS. The city manager is hopeful that the issue will be resolved in time to proceed with the project this year. If not, the project will be delayed and will have to re-apply for funding again next year.

- Discuss use of city water tower for cellular antennas.

The city manager will work to complete a proposal to combine cellular tower construction with the construction of a water tower. Staff will report on the item again in the future.

The following items were tabled to the next regular session: Discussion in regard to the development of a food compost site, discussion related to the city purchase of Poweshiek Water Association accounts in south Grinnell, and review CIP projects – Parks/Bike Trails.
